apple 3d scanner H3251  
2019-05-26

apple 3d scanner H3251 is a high-precision 3D scanner that captures the geometry of objects in real-time. It uses a combination of structured light and stereo vision to create a detailed 3D model of the scanned object. The scanner is designed for professional use and is capable of capturing objects up to 280mm in diameter and 200mm in height. The output resolution is 0.1mm, which allows for the creation of highly detailed 3D models. The scanner is also capable of capturing color information, which can be used to create realistic 3D models. The scanner is easy to use and requires no special software or hardware. It is a versatile and accurate tool for 3D scanning.

### apple 3d scanner amazon

apple 3d scanner is a high-precision 3D scanner that captures the geometry of objects in real-time.
